Print length : 416 pages

The book is divided into four sections:

- **Section I: Basic Principles** provides an overview of the biology of cancer, the principles of cancer diagnosis and staging, and the principles of cancer treatment.
- **Section II: Site-Specific Oncology** covers the diagnosis and management of cancer in different organ systems.
- **Section III: Systemic Therapy** covers the principles of systemic therapy for cancer, including chemotherapy, targeted therapy, and

immunotherapy.

- **Section IV: Supportive Care** covers the principles of supportive care for cancer patients, including pain management, nutrition, and psychosocial support.

Clinical Oncology: Basic Principles and Practice is written by a team of internationally recognized experts in oncology. The book is extensively illustrated with figures and tables, and includes a comprehensive index.
