## What is the CISSP Exam?

The CISSP (Certified Information Systems Security Professional) exam is a globally recognized certification that validates an individual's knowledge and skills in information security. The exam is administered by the International Information System Security Certification Consortium (ISC)<sup>2</sup>, and is based on the CISSP Common Body of Knowledge (CBK). The CBK

is a comprehensive framework that covers all aspects of information security, including security and risk management, asset security, security architecture and engineering, communication and network security, identity and access management, security assessment and testing, security operations, and software development security.

## **Why Should You Get Certified?**

There are many benefits to getting certified as a CISSP. These benefits include:

- **Increased job opportunities:** CISSP certification is highly valued by employers in the information security field. Certified professionals are often given preference for job openings, and may be eligible for higher salaries.
- **Improved earning potential:** CISSP certification can lead to increased earning potential. According to the (ISC)<sup>2</sup> 2021 Salary Survey, CISSP-certified professionals earn an average of 25% more than their non-certified counterparts.
- **Enhanced credibility:** CISSP certification is a globally recognized credential that demonstrates your expertise in information security. Certified professionals are seen as trusted advisors and are often sought out for their advice and guidance.
- **Continued professional development:** CISSP certification is a commitment to continued professional development. Certified professionals must complete continuing education credits every three years to maintain their certification.
